To whom it may concern,

It is a great pleasure to provide this letter of recommendation for Dharam KC.

Dharam is in the three-year advanced diploma program “Computer Programming and Analysis” in our school from September 2017 to April 2020. He is doing well in this program, overall and on my courses, Python Programming, Artificial Intelligence using Python and Machine Learning using Python which are the most important courses in this program and the foundation for general programming and data analysis including data science. He showed that he has very solid education background in mathematics and has very strong analytical skills.

Dharam is a great person to work with. He is always optimistic with a very charming personality. He likes to share his ideas with other people and is eager to help if anyone faces some difficulties. We had a lot of interesting conversations during the learning period. He is very active in participating class discussion and activities.

He is a trustworthy, reliable, good-humored student and friend who supports others in and out of the classroom. He was a pleasure to have in class, and his positive attitude and belief in himself, even in the face of difficulty, is an immensely admirable asset. I'm confident that he will continue to demonstrate the same diligence, perseverance, and optimism that he showed myself and his peers. I highly recommend Dharam for his further study and career in data analysis and data science Please feel free to contact me with any further questions at reza.dibaj@georgebrown.ca.

Sincerely,

Reza Dibaj
